# **COMPANY INFORMATION**

Established in 1980, JM Nault is a supplier of wheel weights and tire accessories. We offer our customers a wide variety of products throughout North America.

At JM Nault, our customer's needs are very important to us. This means we go above and beyond the basic service requirements. We are a professional supplier who will support your aftermarket distribution needs. Look no further than JM Nault!

#### **AT JMNAULT, YOU CAN COUNT ON:**

- An extensive product range
- Excellent quality goods
- Competitive pricing
- On-time delivery
- Professional and courteous service

Let's Do Business!

### Bias Repairs: Versa Cure & Chemical Cure

VULTEC Bias or Diagonal tyre patches are used for a puncture, reinforced and section repairs on passenger, light truck and truck and heavy-duty truck and tractor, tube type or tubeless tyres. VULTEC Bias or Diagonal tyres patches are made with full ply construction they are manufactured with a ply of special rubber compound between the nylon fibres and cushion gum which acts as a float or a shock-absorbing ply, they are given a die-cut by an imported Italian machines and then moulded into an octagonal shape for strength and ease of installation. Tyres injuries from 3 mm (1/8") to 125 mm (5") can be repaired.

### **Radial Tyre Repairs**

VULTEC Radial tyre patches are used to repair a puncture, reinforced and section injuries in passenger, light truck, truck and heavy-duty truck and farm radials/tubeless tyres. The patches are to be centred over the injury because of special code reinforcement and ply construction. Each patch unit features a special compounding and design, directionally polyester fibres, toughened platform providing added strength (wedge construction), heat reduction while preserving flexibility. Die-cut feather edges distribute the cord and stress across the radialised area preventing the lifting of cord edges.

With VULTEC repairs, there is no need to apply the repair from the non-flex area to non- flex area. This special construction reduces the effect of flexing and also reduces inventory requirement since they can be used for CROWN, SHOULDER and SIDEWALL repairs.

### **TUBE PATCHES**

- VULTEC'S Versa cure and Chemical cure repair units are available in sheet form, round and oval sizes for any sizes of tube repair.
- From Bicycle to Off the Road tubes (OTR),
   Curing bags and Envelopes is available in every range.
- Each repair is guaranteed safe and steady and the repair is twice as strong as the original tube itself and leave no edge on repair area. The high quality of Vultec's repair is highly reliable and offers the best service.

### PILOT WIRE PLUG PATCHES (PWPP) DUAL CURE

Mahant's Vultec Pilot Wire Plug Patches can be used for Crown, Shoulder and Sidewall injuries in Bias and Radial tyres especially in passenger, light truck and truck tyres. Vultec has designed the PWPP with 30% more usable stem length and 25% thicker cap which helps repair injury up to 25 mm in Bias tyres, 13 mm in Radial tyres and specially designed rubber compound allow the repair unit to flex and resist heat and dual-cure cushion gum coats which results in permanent bond with tyre.

### CHEMICAL VULCANIZING FLUID (CVF)

#### Rubber Solution

The Rubber Solution (CVF) eliminates the lack of proper drying time which is the most common cause of failed repairs in the tube or tubeless tyres, a fast-drying solvent reduces the waiting and repair failures due to a wet fluid. CVF activates the chemical vulcanizing process to repair tyre casing.

#### Rubber Solution (CVF)

Product Code Rubber Solution	Product Description	Size	Qty Per Box
CMT401	Rubber Solution (CVF) Tube	30 ml	25
CMT402	Rubber Solution (CVF) Tube	75 ml	25
CMT403	Rubber Solution(CVF) Small Tin	250 ml	10
CMT404	Rubber Solution(CVF) Medium Tin	500 ml	8
CMT405	Rubber Solution(CVF) Large Tin	1000 ml	10

#### **Blue Cement**

The Blue CVF/ Cement contains unusual accelerator solution used for self- vulcanization starting from 18-degree C up to 150-degree C. It also identifies where the fluid has been applied after fluid has dried. It also reduces waiting and repair failures and activates the chemical vulcanizing process to repair tyre casing.

#### Blue Cement (CVF)

Product Code Blue Cement	Product Description	Size	Qty Per Box
CMT406	Blue Cement small Tin	250 ml	10
CMT407	Blue Cement Medium Tin	500 ml	8
